Response to Arguments

Applicant's arguments with respect to rejected claims (filed on 8-15-2007) have been considered but are moot in view of the new ground(s) of rejection.

Improper Terminal Disclaimer

The Terminal Disclaimer filed on 8-15-2007 is disapprove because the filing date for copending application No. 10/506,867 is 3-3-03, which is wrong. The correct date is 9/3/2004

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to

Art Unit: 2627

be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-3, 6-12, 15-18 are also provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-30 of copending Application No. 10/804,328. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1-3, 6-12 and 15-18 of present application are broad enough to read on claims 1-30 of application No. 10/804,328.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 7-11, 16-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Cheong et al (US 6,961,300).

Claims 1, 2, 7-11, and 16-18 are also rejected under 35 U.S.C. 102(b) as being anticipated by Japanese patent (JP 08-096412, cited by applicant).

Both above references disclose an optical information recording medium for storing information which can be reproduced by irradiation of light beam. The medium comprises a temperature responsive layer wherein the reflectance changes with change in temperature caused by the irradiation of the light beam

With respect to "a layer of thermo-sensitive material (see paragraph 5, lines 14-28) or ZnO (see column 6, line 9) and a light absorption layer..
